Subject: **Reference for Mindaugas Vertinskas.**

To whom it may concern,

This is a personal letter of reference to attest that Mindaugas Vertinskas worked for Seaway Heavy Lifting on the Beatrice Offshore Wind Project from 15/03/17 to 16/11/17 during the fabrication of Jacket sub-components

Mindaugas's position as Quality control Inspector for Seaway Heavy Lifting was to oversee the activities of our fabrication subcontractors in Lithuania at Western Construction Yard Klaipeda and in Denmark at Bladt Industries Lindo.

Mindaugas's duties during the production phase (Lithuania) were varied and covered all aspects of fabrication ranging from Weld procedure qualification, Welder qualification, material & consumable receipt/certification & control, Monitoring and reporting of all production activities, witness of Non Destructive Testing, Review of all site documentation and reports and Final inspection release.

On completion of sub component fabrication, Mindaugas was transferred to Denmark and joined the site team responsible for the review and approval of the completed Jacket Manufacturing record books.

During his time on the project I found Mindaugas to be punctual, diligent, knowledgeable and a pleasure to work alongside. Mindaugas's considerable experience was an asset to both Client and subcontractor alike and very much appreciated. I would have no hesitation whatsoever in employing Mindaugas in the future or recommending him to any prospective employer.

Should you wish to discuss this reference further, my contact details are:
